| Date of entry                              | Apr 18, 2008                   |  |
| Manufacturer                               | Drooff Kaminöfen GmbH & Co. KG |  |
| Model                                      | Prima                          |  |
| Nominal heat output [kW]                   | 8                              |  |
| Declared nominal space heating output [kW] | 8                              |  |
| Continuous burning appliance               | -                              |  |
| Type test standard                         | DIN EN 14785                   |  |
| Year of testing                            | 2007                           |  |
| Test laboratory                            | Technische Universtität Wien   |  |
| Number of test laboratory                  | 7                              |  |
| Number of test report                      | PL-0766-P                      |  |

Flue gas values

|                             | Pellets |
|-----------------------------|---------|
| Flue gas mass flow [g/s]    | 6       |
| Flue gas mass flow [g/s]    | 118     |
| Necessary flue draught [Pa] | 40      |
|                             |         |

Further important characteristics of the appliance

| Suitability for installation to a shared flue <sup>1)</sup> | - |
|---|---|
| Connectivity to the central heating system                  | - |
| General technical approval for room sealed operation        | - |

<sup>1)</sup> For unsealed operation it is possible to install the appliances to a shared flue system (please see installation manual).

On behalf of the manufacturer, the HKI Industrieverband e.V. hereby confirms compliance with the respective requirements\* in accordance with 1.BImSchV. The type test report of the fireplace has been submitted to the HKI Industrieverband e.V.

\* A green check mark with a "1" indicates that the requirements of the 1st BImSchV are fulfilled, a green check mark with a "2" indicates that the 2nd level of the 1st BImSchV is fulfilled. A yellow check mark shows that the transitional regulation of the 1st BImSchV is fulfilled and a red line means that the 1st BImSchV is not fulfilled.
